- Node.js
- Git
- npm

Professional Experience

Prime Digital Academy

June 2017 - October 2017

Full Stack Software Development Student

Individual Project: "PC It Together"

- Built to assist consumers interested in building a computer to ensure their desired parts will result in a functioning machine.
- Users may select from a dropdown list of parts of their desired build, and PC It Together will notify the user where the build may not be compatible.
- Developed with Mongo, Express, AngularJS, Node.js, Angular Material, JavaScript, Passport, SweetAlerts2 and FileStack API.

Group Project: "Belwin Citizens Science App"

- Our client Belwin Outdoor Science requested an application to convert their paper data collection to an easy to use form that can be used offline and online.
- Collaborated and communicated in a team of five to complete the project.
- Main responsibility to assist with making requests from the database to display for users.
- Developed with SQL, Express, AngularJS, Node.js, Angular Material, JavaScript, and Passport.

Associated Global Systems

May 2014 - April 2017

Customer Service Representative

November 2014 - April 2017

- Worked with a group of three others in the Special Accounts department, communicated thoroughly with vendors, freight forwarders and end customers for fast and efficient shipment transit.
- Main responsibility was routing shipments with suppliers for day and night operations.
- Assisted in resolving damaged, missing and delayed shipments issues.

Customer Service Representative
(Contract through AppleOne)

May 2014 - November 2014

- Tracked and reported transit of shipments.
- Responsible for detailed notes of each shipment on a daily basis for the Best Buy account.
- Point of contact for delivery agents to ensure weekly deliveries were completed within the proper timeframe.

Target (Contract through AppleOne)
Data Entry Specialist

May 2013 - September 2013

- Assisted with the transition of the application upgrade by ensuring their history of data was correctly transferred and investigated and addressed issues of incomplete and incorrect data.
- Communicated and worked with a diverse group of Data Entry Specialist to ensure the project was completed to meet the deadline.
